

Assembly instructions for 50 mm wooden blinds

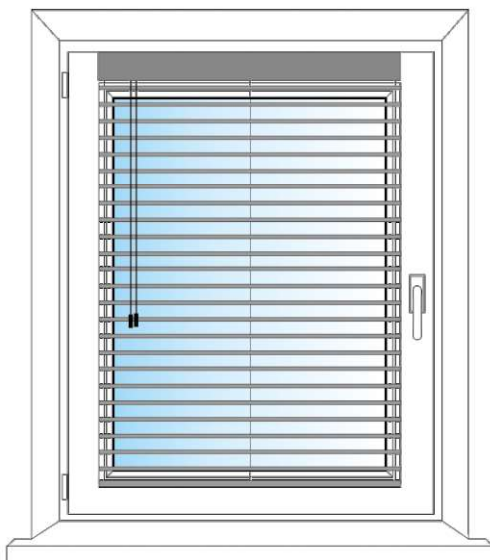

Depending on the type of assembly you have chosen, there are 3 ways to install 50 mm wooden blinds.

Wall mounting

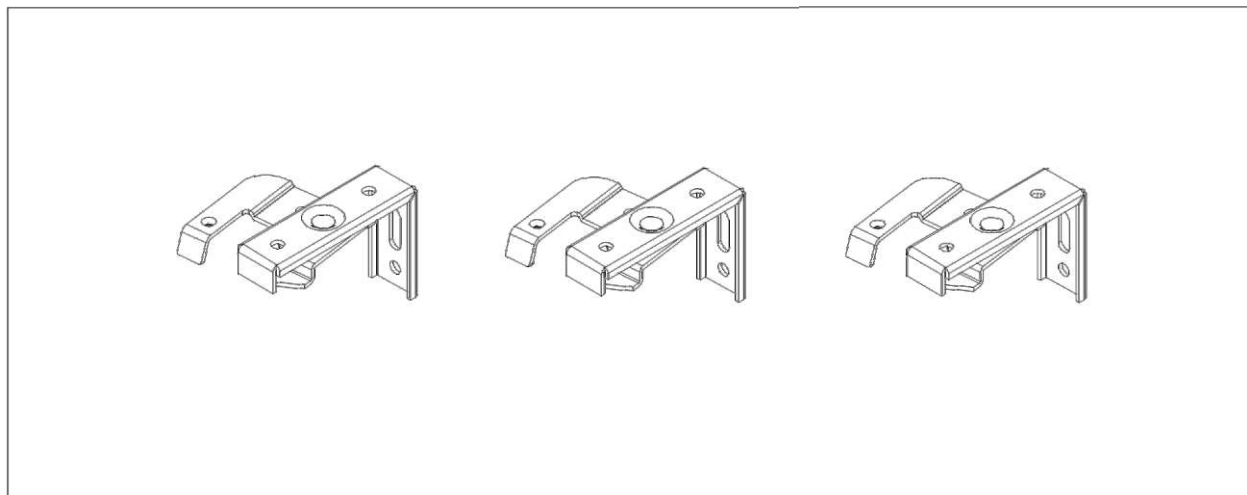

Installation in a recess

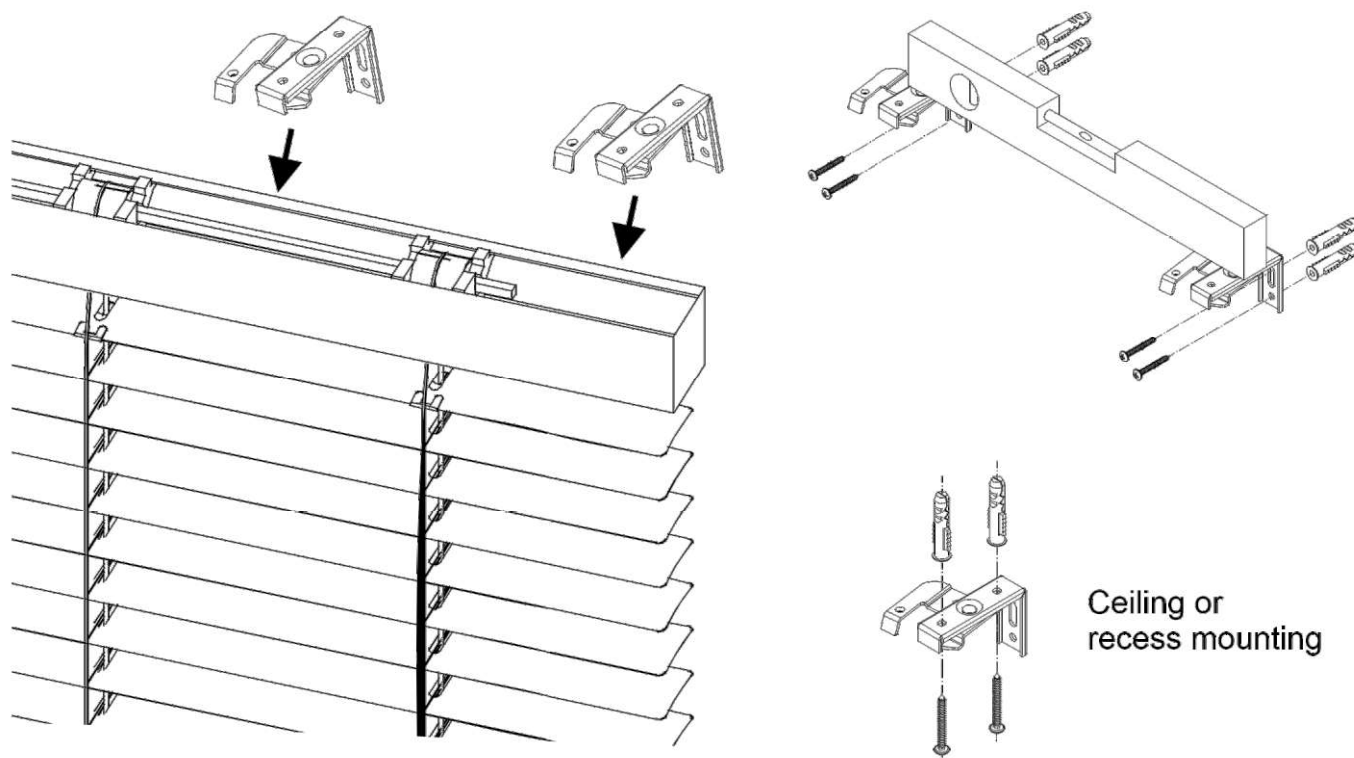

Installation
on the window
on the window frame

The following mounting hangers are supplied with the blind. Their number depends on the width of the blinds. A minimum of 2 pcs, a maximum of 5 pcs. The set does not contain mounting pins or screws. The type of pins or screws depends on the material the walls or kitchen joinery are made of. The customer decides which pins or screws to use.

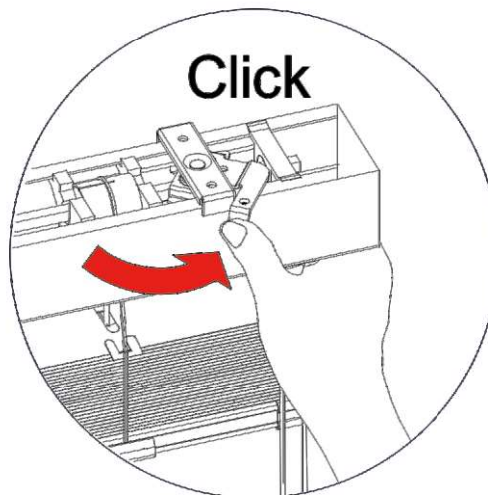

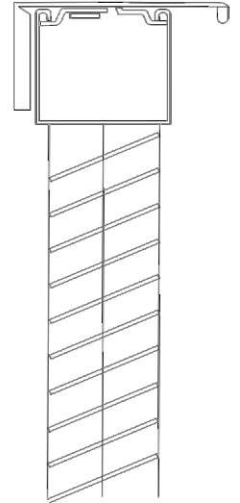

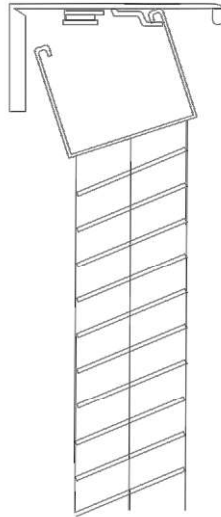

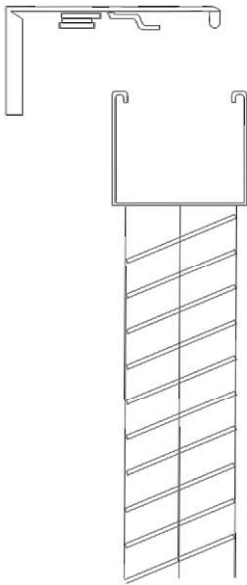

Stage 1

Mount the mounting hangers in such a way that they do not interfere with the elements inside the gutter. For the blind to work correctly it must be mounted horizontally.

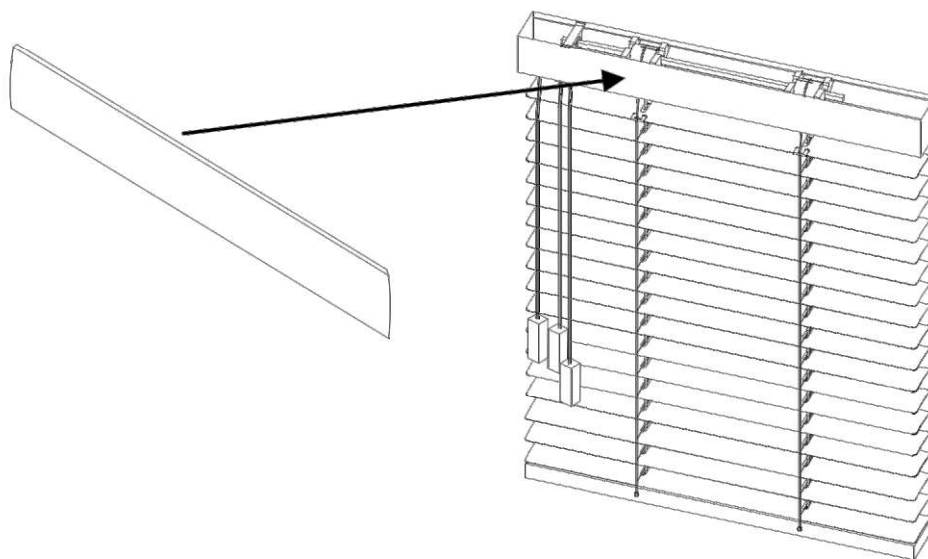

Stage II

Attach the blind to the mounting hangers. See the following 3 illustrations showing the order in which the blinds are fitted in the hangers. The last step is clicking the hanger lever.

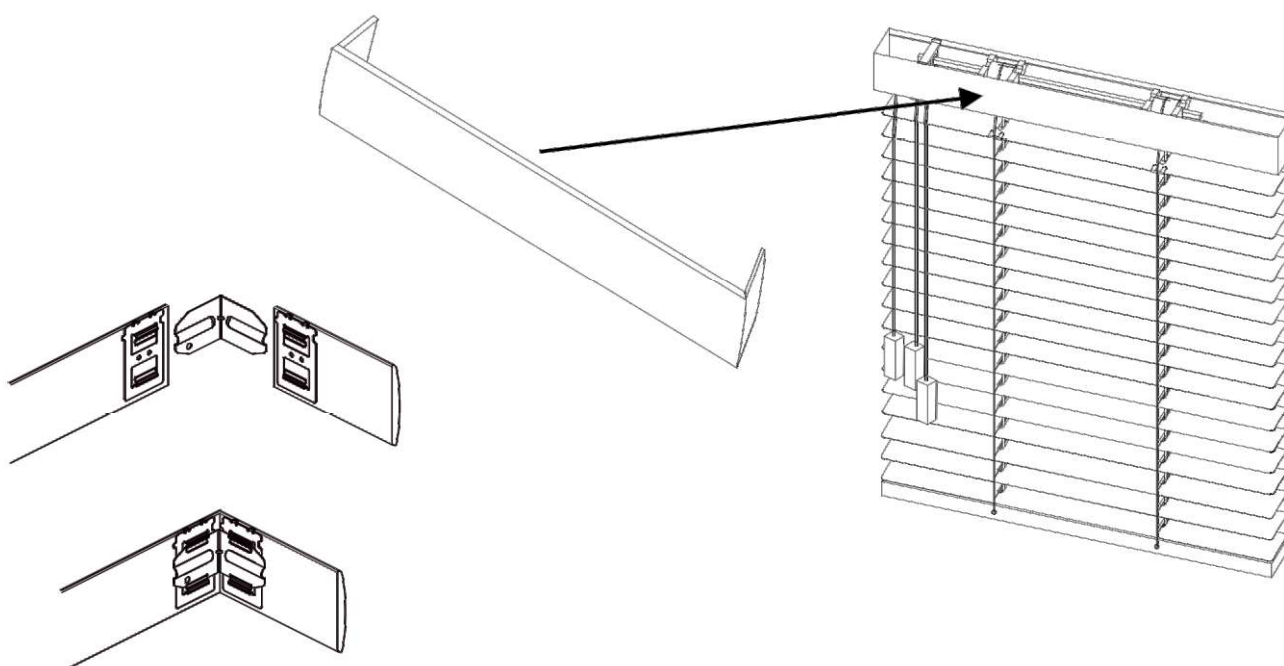

Stage III

Place on the gutter the selected masking cover. The cover is equipped with magnets that will stick to the gutter.

If a masking cover with sides has been selected, attach it using the supplied angle brackets.

Stage IV OPTION

If lateral guidance on the strings was chosen, then additional accessories were added. The following illustration shows how to install it. Cut off an excessive amount of string, after installation.
