

Measuring instruction for DUO roman blinds made of two fabrics, mounted on the wall or on the ceiling.

Choose a window

Measure

Install

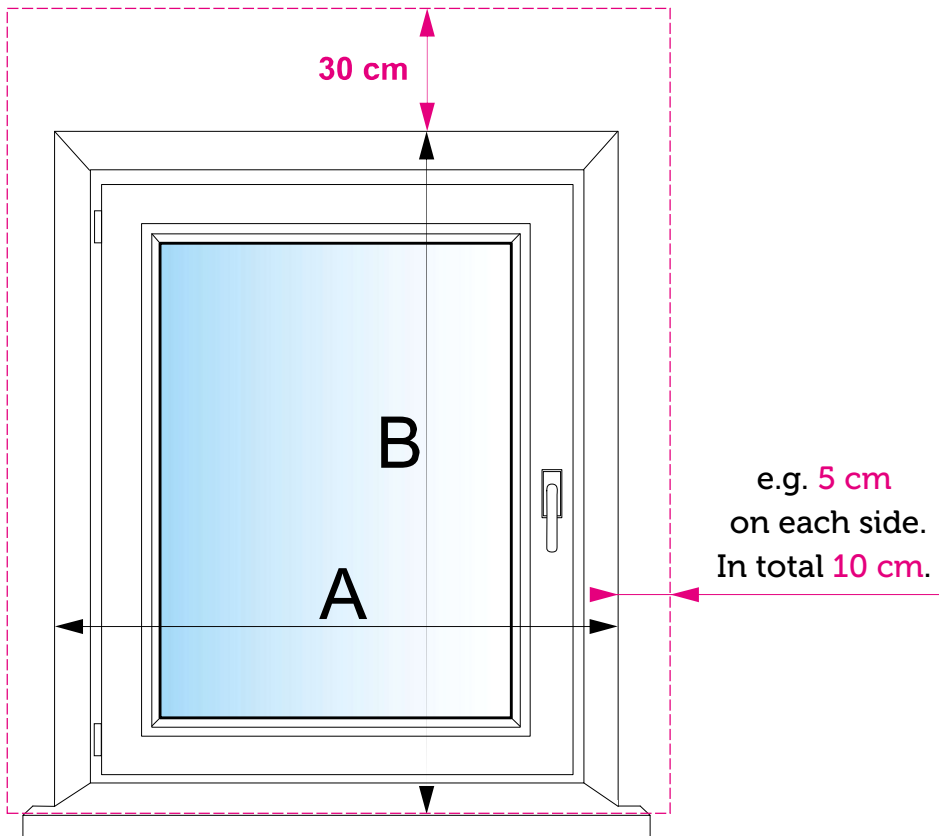

Measurements are given in centimetres (cm).

You specify the width and height of the fabric in front of the blind.

! The fabric in the back of the blind will be narrower by 2cm from the fabric in front. Keep in mind that the folded blind takes about 20 to 30 cm.

Horizontal stitching is spaced about 20 to 25 cm.

Fig. 1

Measure the width and height of window recess Fig. 1

Enter the desired width, add the surplus of a fabric overlapping the wall on the right and left at your preference.

(e.g. 10 cm)

Example: A = 125 cm

$125 + 10 = 135$ cm

Specifying the desired height, add surplus depending on the height at which you want to mount the blind. (e.g. 30 cm).

Example: B = 150 cm

$150 + 30 = 180$ cm
