

Installation instructions for free-hanging blinds Day and Night mounted to the wall

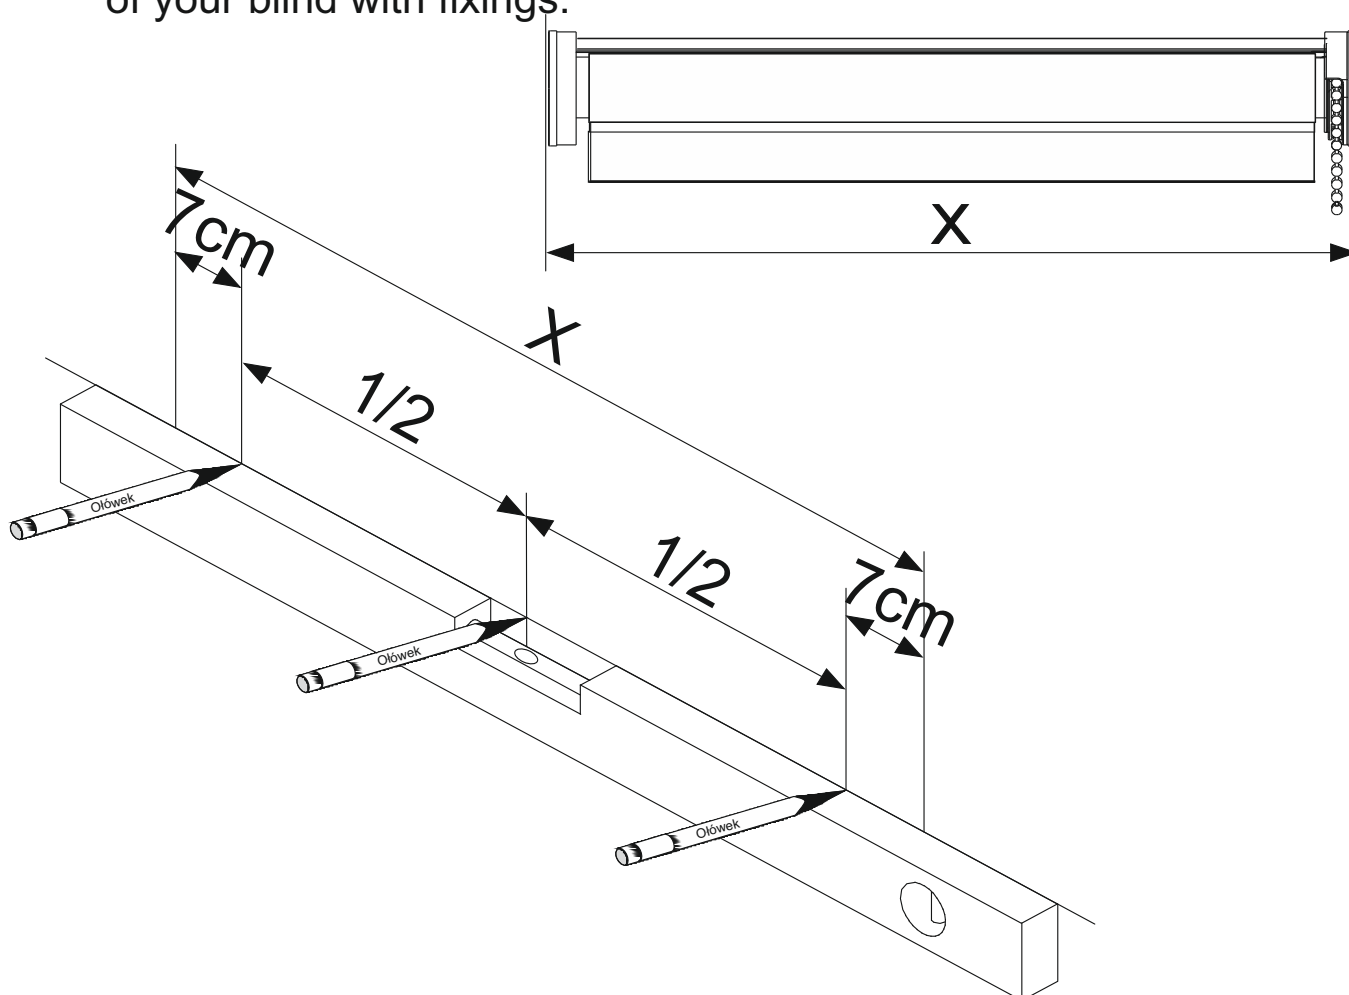

The following mounting clips are provided with the roller blind:
Their number depends on the width of the blind. The set does not include mounting pins as the type of pins depends on the material from which the walls of the building

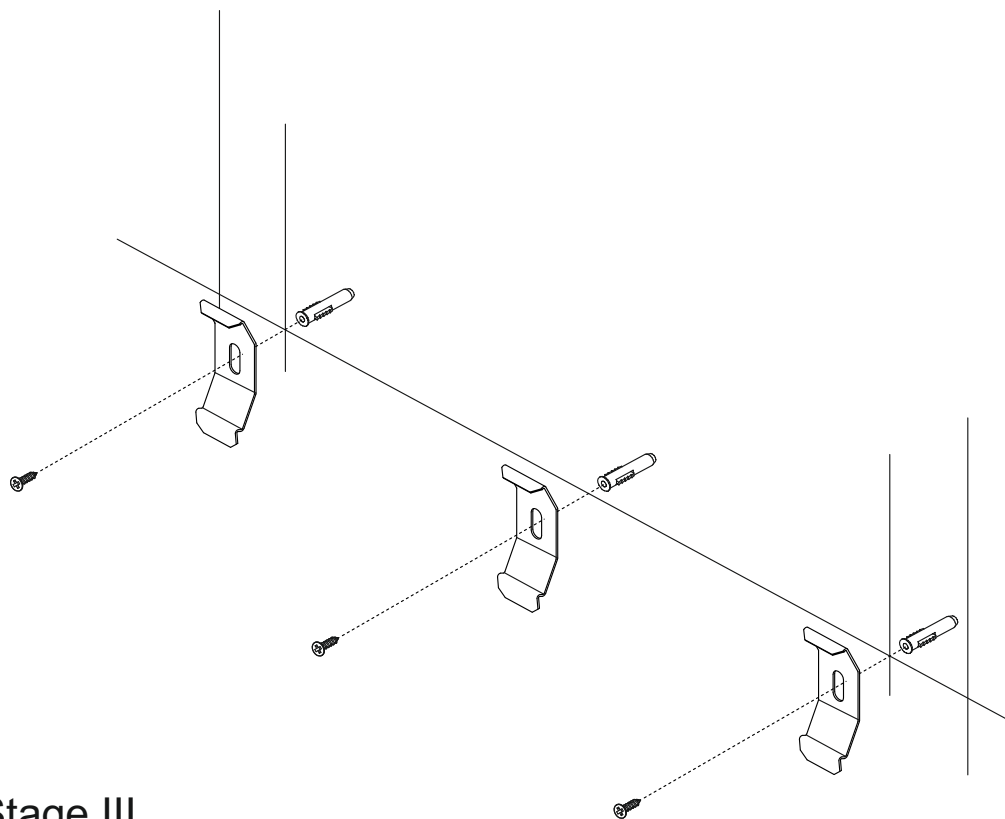

Stage I

Define the mounting position for the clips as shown below. For the roller blind to work properly it must be mounted horizontally. The width X is the width of your blind with fixings.

Stage II

Attach the clips

Stage III

Click the blind in the mounting clips. First, slide the blind into the upper part of the clips and press down.
