

## Dimensioning Instructions for voile curtains with wrinkle band tape

Choose window

Measure

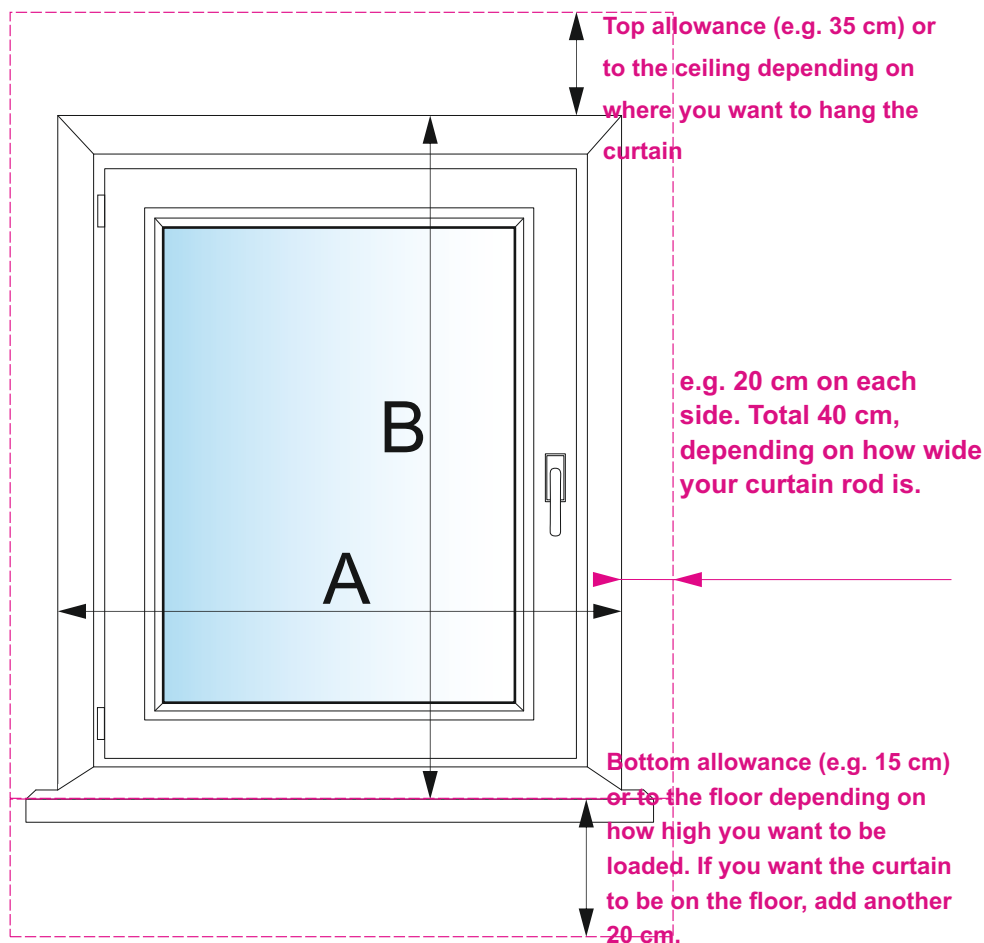

Install

Dimensions are given in centimeters (cm).

 You choose a width of blind before the wrinkling and have a choice of 71, 148, 222, 296, 370 or 444 cm. After a full wrinkling, it will have about half of width. You can partially wrinkle and adjust the width.

Pic. 1

Measure the width and height of the window recess. Pic.1.

Enter a pre-set width Add overhang to weld the curtain to the left and right at the last recognition (e.g. 40cm). Often the width adapts to the width of the curtain rod.

**Example: A = 140 cm**

$140 + 40 = 180 \text{ cm.}$   
In this case, select the 370 cm curtain after the wrinkling, measurement will be about 185 cm.

Enter the pre-set height add a lower overhang to the curtain rod and lower overhang behind the window ledge or to the floor, depending on personal preference. You give the overall height of curtain. Max 400cm.

**Example: B = 250 cm**
